Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-3 and 12, drawn to a process for producing a metallized ceramic shaped article.

Group II, claim(s) 4, drawn to a metallized ceramic shaped article.

Group III, claim(s) 5, drawn to a metallized ceramic shaped article with a branched crack.

Group IV, claim(s) 6, drawn to a metallized ceramic shaped article with substantially absent voids in the oxide layer.

Group V, claim(s) 7, drawn to a Peltier element with a ceramic substrate having a branched crack.

Group VI, claim(s) 8, drawn to a Peltier element with a ceramic substrate with substantially absent voids in the oxide layer.

Group VII, claim(s) 9, drawn to a process for producing a Peltier element.

Group VIII, claim(s) 10-11, drawn to a Peltier element with a ceramic substrate produced by process steps D and E.

Group IX, claim(s) 13, drawn to a metallized ceramic shaped article.

Group X, claim(s) 14, drawn to a metallized ceramic shaped article.

2. The inventions listed as Groups I-X do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical feature of Groups I-X is a metallized ceramic article. However, this common

technical feature cannot be a special technical feature as it is known in the prior art (see abstract of JP 2003-96554).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
